EXPERIENCE

Amazon

Seattle, WA

Front End Engineer II

Jun 2019 - Present

- Launched a new product manuals experience on Amazon's detail page, increasing CTR by 50%.
- Created a new Amazon Search experience to allow users to ask questions from the search bar.
- Developed a service used across several teams for dynamic form generation via AWS AppConfig.
- Directed front end development best practices as the sole Front End Engineer on the team.

Rackspace

Blacksburg, VA

Software Developer Intern

Jun 2018 - Aug 2018

- Created a new admin page for prod ops that vastly simplified supporting Rackspace customers.
- Wrote new API endpoints to allow AWS permissions to map seamlessly with Rackspace Identity.
- Authored integration tests and migration scripts for syncing AWS permissions with Identity roles.

Mozilla

Mountain View, CA

Software Engineer Intern

Jun 2016 - Aug 2016

- Enhanced Firefox's password suggestions menu by adding support for websites with subdomains.
- Refactored disabled-host APIs to use the permission manager Desktop/Android Firefox.
- Fixed regressions for Firefox Electrolysis and improved dialogs and notification popups.

Codecademy

Remote

Content Creator & Coding Advisor

Dec 2015 - May 2015

- Mentored cohorts of 200 students at a time as a solo instructor for React and JS content.
- Created a JavaScript project for Codecademy Pro members as a part of a new JS course.
- Instructed new coders how to avoid bugs and how to go through the process of fixing existing ones.

IEEE

Piscataway, NJ

Application Developer Intern

Jun 2015 - Nov 2015

- Created a UI for admins to automate the process of syncing changes to the relevant databases.
- Improved the IEEE Innovate site by using cookies to display tailored web-content.
- Wrote endpoints that allowed operations to be used for managing data involving teams at IEEE.

Johnson & Johnson

New Brunswick, NJ

Web Developer Intern

Jan 2015 - Jun 2015

- Developed SharePoint front-ends as the sole dev and used jQuery UI to create responsive widgets.
- Improved existing web pages by adding cross-browser compatibility and using polyfills.
- Created a standard for SharePoint web part development for future employees.
