Experience

Amazon   Seattle, WA
Front End Engineer II   Jun 2019 - Present

- Launched a new product manuals experience on Amazon's detail page, increasing CTR by 50%.
- Built a new Amazon Search experience to allow users to ask questions from the search bar.
- Developed a service used across several teams for dynamic form generation via JSON schemas.
- Designed and engineered a new application for new Amazon hires to submit their personal info.

Investroo Inc.   Remote
Software Engineer   Sep 2018 - Jun 2019

- Engineered the first version of the "Zoya" stock screening mobile app for iOS and Android.
- Developed the custom design system used across the different screens in the Zoya app.

Rackspace   Blacksburg, VA
Software Developer Intern   Jun 2018 - Aug 2018

- Implemented a new admin page for prod ops that vastly simplified Rackspace customer support.
- Wrote new API endpoints to allow AWS permissions to map seamlessly with Rackspace Identity.

Mozilla   Mountain View, CA
Software Engineer Intern   Jun 2016 - Aug 2016

- Revamped Firefox's password suggestions menu by adding support for websites with subdomains.
- Fixed regressions for Firefox Electrolysis and improved dialogs and notification popups.

Codecademy   Remote
Content Creator & Coding Advisor   Dec 2015 - May 2016

- Mentored cohorts of 200 students at a time as a solo instructor for JS/React projects.
- Created JavaScript projects for Codecademy Pro members as a part of a new JS course.

IEEE   Piscataway, NJ
Application Developer Intern   Jun 2015 - Nov 2015

- Created new UIs and authored API endpoints for the IEEE Innovate site admins.
- Wrote endpoints that allowed operations to be used for managing data involving teams at IEEE.

Johnson & Johnson   New Brunswick, NJ
Web Developer Intern   Jan 2015 - Jun 2015

- Developed SharePoint front-ends as the sole dev and used jQuery UI to create responsive widgets.
- Refined existing dev workflows with version control and well-written documentation.
